

Sage MIP User Group

Transaction Reports

Ever posted a transaction and a week later forgot what it looked like? What if you could copy an existing report and make a few changes rather than start from scratch? With Sage MIP, you can! We'll show you how to build a report that can then be run at the click of a button.

Bank Reconciliation

I've been meaning to use Sage MIP's Bank Reconciliation, but I'm just not quite sure what Suspense means. Maybe I'll start next month. If this sounds familiar, you won't want to miss our discussion. We'll share tips on how to manage and reconcile bank balances and cash transactions.

Electronic Requisitions

As funding becomes increasingly important to nonprofit/government agencies, you need to make the most of your limited resources. We'll take a brief look at an electronic requisition/purchase order module that can eliminate paper, more effectively manage the flow of information, and provide enhanced budgetary controls over your purchasing system.

"After Glow": EWS and HR Management (The meeting officially ends prior to this presentation. Stay only if you choose.)

Looking for a web-based solution to enter, update, and approve employee timesheets? Check out Sage's EWS and HR Management. Relieve the burden of HR record keeping and document requests. Employees can print historical paychecks, even W-2s.
