

UNLEASH THE VALUE OF SAGE INTACCT

The number of applications relied on by accounting and finance is increasing. Therefore, you need easy-to-deploy integration software or iPaaS.

The right iPaaS solution empowers your finance team by:

- Eliminating manual CSV or Excel extractions, transformations, and uploads
- Keeping data across systems in sync
- Ensuring timely and accurate reporting
- Eradicating human errors
- Maximizing your tech stack's value

DataBlend is the leader in Sage Intacct integrations because of our robust experience with Sage Intacct and focus on Finance departmental needs. In fact, most of our implementers have either been users of Sage Intacct or worked at Sage Intacct. This means that we can deliver fast implementations to maximize the time to value for many of our clients by using our user-friendly setup wizards. See our Sage Intacct connection: <https://datablend.com/integrations/sage-intacct>

FAST, SECURE, WORRY-FREE INTEGRATIONS

DataBlend is the only iPaaS provider dedicated to finance and accounting workflows. Whether your tech stack includes cloud or on-prem applications (e.g. ERP, CRM, HR/payroll, budgeting, or financial close, etc.), DataBlend delivers the integrations you need.

The power of DataBlend:

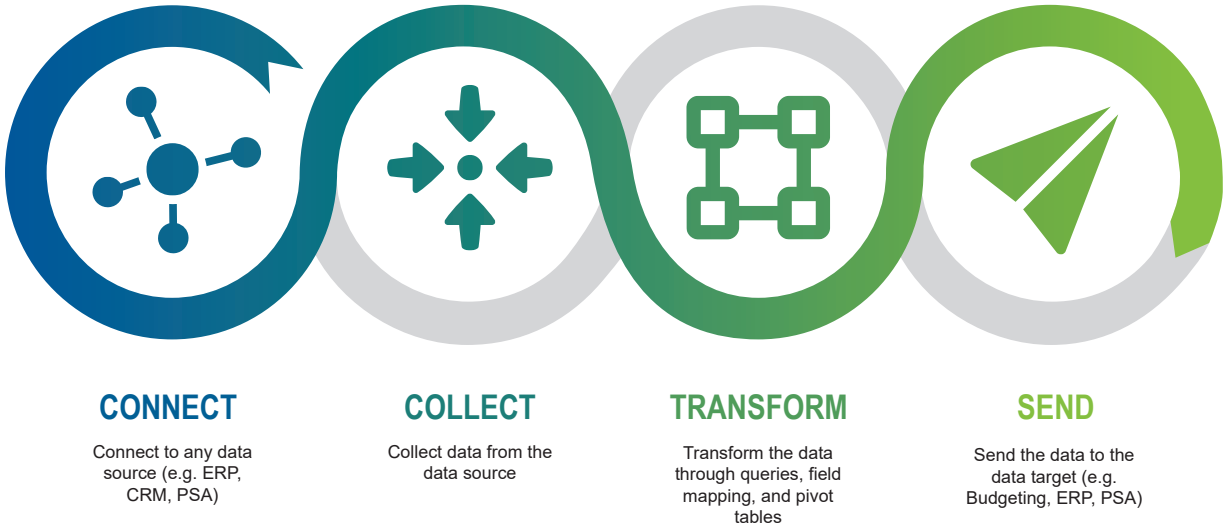

- A turnkey, no-code, low-code solution that delivers fast, reliable, and secure integrations without burdening internal IT resources
- Our focus is serving the needs of CFOs, controllers, and financial planning and analysis (budgeting) professionals as they look to streamline processes, speed up closes, and increase confidence in reporting
- Data forensics support that lets you focus on meeting deadlines and delivering reliable information

AUTOMATED DATA TRANSFORMATIONS ELIMINATE MANUAL EFFORT AND SAVE MONEY

With integration comes automation, which is key to streamlining business processes, efficiency gains, and cost savings. Organizations are losing \$140 billion every year due to disconnected data. Automation can empower finance teams to spend more time analyzing the data instead of working on the data. Organizations are turning to iPaaS to synchronize their data and build automations between all their applications.

FOUR STEPS TO TRANSFORMING CFOS INTO AUTOMATION SUPERHEROES

DataBlend takes the stress out of integration. We understand what is important to accounting and finance professionals and invest in building the connections finance professionals need to run an efficient and scalable operation. DataBlend makes the process of getting all your integrations up and running straightforward.

INTEGRATIONS WITHOUT THE BIG PRICE-TAG

At DataBlend, we understand CFOs and controllers don't want to spend more on integration than they do on their mission-critical applications. Our goal is to create standard connections for commonly used applications and out-of-the-box templates and wizards for typical data flows and transformations. This keeps total cost of ownership in line with expectations. See our pricing: <https://datablend.com/pricing/>

INTEGRATIONS WITHOUT CUSTOMIZATION

Because we listen to finance professionals, we are constantly adding new connections each month that the Sage Intacct community relies on. This increases the likelihood that we will have the integration you need, now and into the future. See our integrations: <https://datablend.com/integrations/>

“ The sheer volume of data that DataBlend can process and integrate is incredible. Seamlessly extracting, transforming, and connecting data from multiple systems into Sage Intacct. It saves us countless hours and significantly reduces costs, allowing us to focus on higher-value work for our clients.

Creative Planning Business Services

BUILT FOR FINANCE, BY PEOPLE THAT KNOW FINANCE

You want more than great technology. You want great service from people who understand what challenges you face every day. You need a service that makes it easy to add a new connection when a new application is added. Service that can troubleshoot an issue when data from one system to the next is not tying out. Service that can help build a new workflow when requirements change.

Popular Sage Intacct Connectors

- Sage Intacct to Blackline
- Workday Adaptive Planning to/from Sage Intacct
