What's New in Sage 100 Fund Accounting Version 2013.4

New Version Summary

Version 2013.4 contains a great deal of improved functionality and additional enhancements designed by users and industry experts. Our goals for this release are to introduce our Sage 100 Fund Accounting Mobile App, increase automation with email communication, and show increased functionality to our Bank Reconciliation module

New Features

Sage 100 Fund Accounting Mobile App

- Sage Mobile provides you with an application to quickly perform key tasks directly from your mobile device or tablet.
- Make important decisions on the spot by viewing account balances directly from Sage Mobile.
- Keep internal processes streamlined by taking quick action to approve requisitions.
- View key reports and drill down into the detail most important to you.

Automated Email Communication

- Send customers an up to the minute statement of their account via email at any point in the billing cycle.

Bank Reconciliation Updates

- Enter cash transactions such as interest earned and use new buttons to jump right back to the bank reconciliation module without losing your spot.
- Provide auditors with proof points of reconciled status over time using snapshot functionality to roll back through bank reconciliations.

Human Resources/Employee Web Services

- View and update employee credentials in HR, and view certifications for all employees in one place.
- Add a web timesheet for holiday time for all employees, making holidays easier for employees and managers.
- Remain compliant to funder restrictions with and automated employee timesheet certification process added. Once employees approve their time sheets, managers can now approve all time in one place.

As always, we fixed some bugs and made a few minor tweaks to improve your experience with Sage 100 Fund Accounting. Enjoy!
